Gary Safarik

Dear Gary,

On behalf of the Auto Repair classes at Pahoa High and Intermediate school, I would like to thank you for the support you have shown our auto repair program. Your commitment, hard work, and/or donations have made it possible for our classes to be equipped with four new tool boxes and tools to fill them. This will enable our students to work in groups on many different projects. Through these projects, students will not only learn basic fundamentals, but team work, responsibility, communication, and pride in doing quality work. All of which are important skills needed in life as well as making the students more employable in the future.

With vehicles constantly changing, new equipment is needed to keep the facility up to date. Therefore I would like to once again thank you for the opportunities these tools will afford our classes, particularly in terms of marketable skills in the ever tightening job market.

Thank You,

John S. Ritchie
Pahoa Shop Teacher
